

A screenshot of a browser window showing the developer tools open. The title bar says "Hotelinventoryapp" and the address bar says "localhost:4200". The main content area displays the text "hello world!" and "rooms works!". Below this, the developer tools Elements tab is active, showing the DOM structure of the page. The DOM tree includes the root element <html>, head, body, and a custom element <hinv-root>. The <hinv-root> element has attributes "ng-version='21.0.3'" and a child script element with "src='main.js' type='module'".

```
<!DOCTYPE html>
<html lang="en">
  <head>...</head>
  <body>
    ... <hinv-root ng-version="21.0.3"> -- $0
      <h1>...</h1>
      <hinv-rooms>...</hinv-rooms>
    </hinv-root>
    <script src="main.js" type="module"></script>
  </body>
</html>
```

The screenshot shows a browser window with the URL "localhost:4200". The page content includes a large "hello world!" heading, a "Welcome to Hilton Hotel" sub-heading, and some room count information. The developer tools are open, specifically the Elements tab, which displays the HTML structure and associated CSS styles for the "hello world!" heading. The styles panel shows the following CSS for the h1 element:

```
h1 {  
    display: block;  
    font-size: 2em;  
    margin-block-start: 0.67em;  
    margin-block-end: 0.67em;  
    margin-inline-start: 0px;  
    margin-inline-end: 0px;  
    font-weight: bold;  
    unicode-bidi: isolate;  
}
```

The element inspector shows the bounding box of the h1 element, with a total width of 21.440 and a height of 799.200, positioned at 37.690 from the top-left corner.

The screenshot shows a browser window displaying a simple Angular application. The URL is `localhost:4200`. The page content includes:

- A heading **Welcome to Hilton Hotel**.
- A message **Number of rooms:**
- The value **10**.
- A button labeled **No rooms** with a **Toggle** link.
- An **h1** element containing the text **hello world!**.

On the right side of the browser, the **Elements** tab of the developer tools is open, showing the generated HTML code:

```
<!DOCTYPE html>
<html lang="en">
  <head> ... </head>
  <body>
    <hinv-root ng-version="21.0.3">
      <h1>hello world!</h1>
      ...
      <hinv-rooms> -- $0
        <h1> @</h1>
        <div> @</div>
          " No rooms "
        <!--container-->
        <button> @</button>
      </hinv-rooms>
    </hinv-root>
    <script src="main.js" type="module"></script>
  </body>
</html>
```
